

Evening Primrose Seed

As a specialty oilseed, Evening Primrose Seed is predominantly pressed for oil. Evening Primrose Oil (EPO) is a renowned source of Gamma Linolenic Acid (GLA), and has high levels of the Essential Fatty Acid (EFA), Linoleic Acid, these fatty acids help in the strengthening of cell membranes, and nourishing and revitalising skin tissues.

Evening Primrose Oil is extracted from the seed of the Evening Primrose plant (*Oenothera biennis*) and is common in both nutritional and skincare products. GLA is a precursor for a number of important hormone-like biological functions required for many vital processes within the body. Used as a moisturiser, it gives skin a smoother appearance which may be helpful to those with skin conditions.

Technical Data

Product Name: Evening Primrose Seed

Botanical Name: *Oenothera biennis*

Food Safety: This product has been produced in accordance with HACCP principles

Shelf life: 12 months from production date

Allergen Statement: No allergens. Gluten may be present

GM Status: Produced in a GM free production process

Certifications available: HACCP. Kosher and Halal available on request

Product Variations:

- Evening Primrose Seed
