Meadowfoam Seed

As a specialty oilseed, Meadowfoam Seed is predominantly pressed for oil. Meadowfoam Oil is Cold Pressed from the seeds of *Limnanthes alba*.

It is unique to other oils in that it contains more than 95% Long Chain Fatty Acids and these unique fatty acids make Meadowfoam Oil particularly stable and resistant to oxidation and deterioration. As a result, it is a key ingredient for extending the shelf life of skincare products.

Meadowfoam Oil is a sought after ingredient due to its ability to retain moisture on the skin. It is widely used in skin and hair care applications because it is moisturising, extremely stable, and capable of adhering to and staying on the skin. When applied to the skin, it forms a moisture barrier which proves invaluable in these products. Meadowfoam Oil is also currently being studied for pharmaceutical and industrial use.

Technical Data

Product Name: Meadowfoam Seed

Botanical Name: *Limnanthes alba*

Food Safety: This product has been produced in accordance with HACCP principles

Shelf life: 12 months from production date

Allergen Statement: No allergens. Gluten may be present

GM Status: Produced in a GM free production process

Certifications available: HACCP. Kosher and Halal available on request

Product Variations:

- Meadowfoam Seed
