

## Sunflower Oil High Oleic

Sunflower Oil High Oleic is Cold Pressed from the seeds of the Sunflower (*Helianthus annuus*). It is a clear odourless oil that is commonly used as a cooking oil.

Sunflower Oil High Oleic is very similar to Olive Oil in that it is monounsaturated which means it has high amounts of Oleic Acid (Omega 9), as well as Vitamin E and a low proportion of saturated fat per total fat content. Its high smoke point means it is able to be cooked at extremely high temperatures without compromising its nutritional profile, making it a great cooking or frying oil.
