

Evening Primrose Oil

Evening Primrose Oil (EPO) is a renowned source of Omega 6, Gamma Linolenic Acid (GLA), and has high levels of the Essential Fatty Acid (EFA), Linoleic Acid, these fatty acids help in the strengthening of cell membranes, and nourishing and revitalising skin tissues.

Evening Primrose Oil is extracted from the seed of the Evening Primrose plant (*Oenothera biennis*) and is common in both nutritional and skincare products. GLA is a precursor for a number of important hormone-like biological functions required for many vital processes within the body. Used as a moisturiser, it gives skin a smoother appearance which may be helpful to those with skin conditions.
