

Flaxseed Fibre

Flaxseed Fibre is a co-product of the Flaxseed (*Linum usitatissimum*) after the oil has been extracted.

Flaxseed Fibre is a co-product of the Flaxseed (*Linum usitatissimum*) after the oil has been extracted. This fibre originates in a pellet form which is commonly referred to as Flaxseed Cake and is then further milled (Cold Processed) to produce the final flour product. Flaxseed Fibre contains protein necessary for tissue building and repair, which contributes the growth and maintenance of muscle mass and bone normality. Flaxseed Fibre also has high levels of dietary fibre both soluble and insoluble which contributes to regular laxation. In addition, the oil component provides the Essential Fatty Acids (EFAs) Alpha Linolenic Acid (Omega 3, ALA) and Linoleic Acid (Omega 6, LA). We cannot produce these EFA's ourselves, and therefore they need to be an essential part of our daily diet, making it an ideal functional food ingredient. Flaxseed Fibre provides nutrients that will ensure optimum health and well being for the whole family, and it can easily be incorporated into the daily diet.

Key Nutrients

- Lignans
- Soluble Dietary Fibre
- Insoluble Dietary Fibre
- Carbohydrate
- Alpha Linolenic Acid (Omega 3)
- Protein

Technical Data

Product Name: Flaxseed Fibre

Botanical Name: *Linum usitatissimum*

Active Ingredient(s): Insoluble Dietary Fibre, Protein, Alpha Linolenic Acid (Omega 3), Lignans.

Food Safety: This product has been produced in accordance with HACCP principles.

Shelf life: 12 months from production date.

Allergen Statement: No allergens. Gluten may be present.

GM Status: Produced in a GM free production process.

Certifications available: HACCP and Organic. Kosher and Halal available on request.

Product Variations:

- Flaxseed Fibre
- Organic Flaxseed Fibre
